SUMMARY

MCA student with 9.2 CGPA skilled in Java, Python, React, Spring Boot, Flask, MySQL, and Power BI. Built realworld projects including AI-based applications, full-stack web platforms, machine learning models, and interactive data analytics dashboards.

EDUCATION

Master of Computer Applications

Dr.G.R.Damodaran College of Science
CGPA:9.2

2024-
2026

PG Diploma in Robotics

Dr.G.R.Damodaran College of Science
CGPA:9.1

2024-
2026

Bachelor of Science in Mathematics

Dr.N.G.P Arts and Science College
CGPA:8.0

2021-
2024

SKILLS

Programming Languages:	Python, Java, JavaScript, HTML,CSS
Frameworks:	React.js, Flask, Spring Boot
Databases:	MySQL, MongoDB
Soft Skills:	Problem Solving, Teamwork, Time Management

PROJECTS

CODERADAR AI

Spring Boot, React, MySQL, Gemini AI, JWT

- Built an AI-based platform to analyze Java code for bugs, code smells, and security issues
- Integrated Gemini AI to provide intelligent code improvement suggestions and insights
- Implemented secure JWT authentication and generated downloadable PDF/Excel reports.

CUSTOMER CHURN ANALYTICS

Python, scikit-learn, Random Forest, Power BI

- Built a machine learning model on IBM Telco dataset achieving 79.6% accuracy
- Identified key churn drivers such as monthly charges, tenure, and contract type
- Developed an interactive Power BI dashboard with KPIs, filters, and visual insights.

RAPID RELIEF BLOOD PLATFORM

React, Python(Flask), MongoDB

- Developed full-stack platform for managing blood donor records
- Implemented secure role-based login and real-time blood availability updates
- Automated email notifications to alert donors based on blood group and location.

VINAYAGA MART-GROCERY PLATFORM

React, Python(Flask), MongoDB

- Built a full-stack e-commerce application for grocery shopping platform
- Implemented User authentication, cart management, order processing, payment and passing success message
- Enabled admin control for product listing, stock updates and order tracking.

FACE RECOGNITION USING OPENCV

Python, OpenCV, LBPH

- Built a real-time face detection and recognition application
- Implemented Haar Cascade Classifiers for face detection and LBPH for recognition
- Trained the System with Labeled datasets to improve recognition accuracy.

INTERNSHIP

DATA ANALYTICS INTERN — OneData Software Solutions

Completed a Power BI internship focused on data visualization, dashboard creation, data transformation, and business reporting. Gained practical knowledge in data analytics and reporting techniques using Power BI.

CYBER SECURITY INTERN — Verzeo

Completed a 2-month internship in Cyber Security, gaining knowledge in network security, ethical hacking basics, cyber threats, and data protection techniques. Developed analytical and problem-solving skills through practical learning and case studies.

CERTIFICATES

- Certified in Introduction to Modern AI and Introduction to IoT & Digital Transformation — Cisco Networking Academy
- Certified in Cyber Security — Verzeo
- Certified in Design Thinking and Data Analytics with Python — NPTEL
- Certified in Internet Society Learning on Designing and Deploying Computer Networks
- Certified in Innovation, Design and Entrepreneurship (IDE) Bootcamp
